This Set of 11 Colossus Chimes will draw the attention of visitors from all around your park or playground area with their regal, resonating sounds, as well as their towering monolithic bells that can be seen from all around. These are some of the largest instruments that we have available, which means it produces some of the deepest and fullest notes. The chimes can be arranged in countless different patterns, allowing you to shape the instrument and the location to your liking. The chimes are played by striking them with mallets, which are included with the sets. The mallets are connected to posts by long cables, which offer plenty of range to help musicians more easily reach each chime. These sturdy chimes are built to withstand plenty of use as well as unpleasant outdoor conditions.
