- 17-inch height from the ground and 10-inch width
- Color options that won't fade and protect against rust
- Solid and firm 2 3/8-inch frame that will last for a long time period

If you are looking for seating that is sure to elevate your outside areas then the Innovated Style Park Bench Without Back is what you need. This bench is a part of the Innovated Style series, in which the distinctive feature is the small hole perforation that allows for airflow and keeps it dryer and easy to clean after rain. This seat is suggested for places that see a lot of sport and physical activities as the small holes allow sweaty players to sit comfortably but also will not leave a smell, as would happen with fabric or plastic seating options. This is the without back option meaning it can be placed against walls or next to each other to give more seating room. Choose the best seating option for your area from four different lengths. Please note that the 10 and 15-foot model consists of two smaller sections that are bolted together for shipping and portability. This bench is made of punched steel that is coated in a textured polyethylene coating. You can choose from an assortment of color options to add a personal touch to your seating option.
