SALE \$388.00

Highlights:

- Made of heavy-duty metal
- Choose from a wide selection of color options for the frame and bench
- Functional structure that will fit in most areas
- Sporty and trendy structure to add to your area

Achy legs will no longer suffer due to long wait times at the bus stop or waiting for their turn in the game with the Regal Style Park Bench without Back by Webcoat. The seat stands 17-inches off the ground and is 10-inches wide, providing a neat place to rest on. This slim bench can easily be placed on sidewalks or against walls or gates, making it a well-rounded structure. In addition to its versatility, the bench made of #9 expanded metal to create a strong, enduring seat. The frame is made of 2-3/8-inch metal, adding to its sturdiness. The frame and bench are coated in two different types of paint to further protect it. The frame is layered with a powder coat while the bench seat is painted in textured polyethylene color coating that works to protect the metal from rusting, chipping, or fading due to exposure to weather elements. A diverse selection of colors is available to personalize the unit. Select an in-ground or surface mount to keep it in place or make it mobile with the portable base.
