- Choose your color, mounting, and size preference

A lack of seating in a park or outdoor setting denies visitors the chance to sit and enjoy the surrounding beauty that it has to offer. The UltraLeisure Style Park Bench without Back is the perfect addition to any such space because it is compact, comfortable, and affordable. It has a metal pattern that makes it semi-transparent and prevents rain collection as a result of inclement weather. Thanks to the moisture repelling thermoplastic coating on the metal, precipitation slides right through the holes in the metal. This thermoplastic coating keeps the bench free from corrosion as well as rust and can be customized with a wide selection of exciting color options. The UltraLeisure Style Park Bench Without Back is available with permanent in-ground or surface mounting, or in a mobile portable base, meaning that it is suitable for any terrain and any location. Talk to a sales representative about color and mounting options.
