### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Double the fun with this 5-feet Double Free Standing Slide by Playground Equipment Dot-com. Kids will love this slide whether they are just starting to talk to full fledged gabby sixth graders. This is the tallest Double Free Standing Slides offered in this series so you can be assured that has all of the great features of its sister slides with the added height. Made from rotationally molded plastic, the slide is tough while alleviating any of the more traditional rust problems that a steel slide presents. Metal slides also can heat up in hot weather but you don't have to worry about that with this Double Free Standing Slide. Another great feature of the plastic in this slide is that it is UV stabilized allowing for more years in direct sunlight with fewer repercussions. The structure has metal handle bars for grip and balance as they go up the stairs. The stairs designed with the width to handle up to two poorly coordinated children at once. This entire structure can be custom colored including the slide and galvanized steel posts.
