Use Zone: 15' 4" x 23' 7"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Children can't resist great slides. The 4-Foot Straight Single Piece Free Standing Slide is no different. It might seem to be the same as other slides but it stands out from the rest with its UV stabilized rotationally molded plastic, to its ideal size for both old and new riders. Ideal for younger children that need something a little smaller to test out first but still provides a big enough thrill for older children as well. The high galvanized steel rails prevent falls while also providing a way to hold on tight while ascending the stairs. Once kids make it to the peak, a zippy plummet awaits them. The rotationally molded plastic keeps children sliding freely down, yet can tolerate daily abuse making the 4-Foot Straight Single Piece Free Standing Slide a reliable focal point of any location. The simplicity of the slide lends itself perfectly to imaginative play where it can transform into a sled careening down a mountain in the wake of an avalanche or a water slide into the ocean where the mermaids play. No matter what you do, this slide is a flexibly simple piece of equipment that can add to your play area.
