### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

This slide is straight and to the point. The 6-Foot Straight Single Piece Free Standing Slide reels kids in from afar with its eye-catching design. Its function is simple - climb up the stairs, slide down and repeat. But, there is a lot more than meets the eye. The slide itself is made of rotationally molded plastic that is capable of enduring rigorous use. The galvanized steel this unit is comprised of, is powder-coat painted which effectively resists rust build up; allowing the structure to last a lengthy amount of time. The stairs and deck have perforated holes to increase grip and to keep liquids from pooling on their surfaces. The 6-Foot Straight Single Piece Free Standing Slide will keep kids engaged physically and mentally. Pretend time makes this slide even better by turning it into a kayak going down a massive waterfall or perhaps a go cart about to take the lead on the last lap. The potential of this slide is enormous and so is the fun to be had.
