ASTM F1487-17

CPSC PUB #325

The 4-feet Left Turn Free Standing Slide has a familiar design which is sure to delight any young child. The left turn at the bottom of the slide naturally leads children to head back to the stairs for another ride. It features a slide made from tough rotationally molded plastic with a smooth finish and a gentle left turn. Being the second smallest model, it offers a step up from the toddler friendly 3-foot model. This size is perfectly appropriate for both preschool and grade school aged children, meaning it will find lots of use. The top deck and the stairs leading up to it all have protective handrails surrounding them on all sides so that kids have somewhere to hold onto as they wait for their turn. A variety of customizable color options are available for all of the plastic and galvanized steel components providing an opportunity to match it to your specific play area.
