ASTM F1487-17

CPSC PUB #325

The 4-foot Single Straight Hillside Slide is made to utilize nature's own curves. This unique structure makes use of the nearby land formations by transforming them into a child's wonderland. Four feet rotationally molded plastic glides willing children to the ground using the simple premise of a controlled fall that is never a dull experience. Kids can try to keep up with their friends sliding down by running along the hill nearby; only adding to the excitement this unit provides. Let kids land in style by choosing the safety surfacing to compliment this already enthralling slide. A parent is given security with the slide's hill-hugging design that carries its occupants gently to the bottom again and again. The 4-Foot Single Straight Hillside Slide is especially welcoming to younger riders with its safe design and small layout. This simple slide will keep kids safely in motion without compromising on any of its fun. Kids will have some great long-lasting memories while rocketing down this slide.
