Use Zone: 16' 4" x 7' 0"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Jack and Jill's descent may have been more enjoyable if they had the 4-Foot Double Straight Hillside Slide. Allowing two to glide down together, this slide is guaranteed to bring a party to the top of the hill. The design of this slide is where it shines. The posts and deck, making up this unit, are made out of powder-coat painted, galvanized steel. The paint prevents rusting and the galvanized steel keeps the unit stable; providing an exciting experience every time. By being built into a hill, the chances of accidents are lessened tremendously and its overall structural stability is increased. Running back up the hill after sliding down makes for great exercise that is sure to improve kids' health. This may be the safest slide out there with its low-to-the-ground layout that extenuates fun times. You can also add a customizable design to the landing zone with our brightly colored and artfully installed poured in place that will keep play time fresh. Children won't be able to wait to run up their hill just to slide down again.
