**Price \$3,637.00**

### Highlights:

- Perfect for sunny outdoor areas
- Frame and post is powder-coat painted
- Fabric and steel can be color customized
- Large area under the canopy of the shade

---

The Cantilever Umbrella reliably brings shade to the sunniest of areas. The umbrella is positioned overhead with a steel post and frame. It is painted with a rust resistant powder-coat paint, enabling this shade to stand up against daily weather. It can be installed near a swimming pool creating shaded areas, a schoolyard blacktop or even a popular camping ground site. The sun has found a new rival. The Cantilever Umbrellas' color is customizable. The paint color of the metal and the color of the fabric are both modifiable which allows for an aesthetically unique piece of equipment. The glide elbow option will make maintenance easier by adding a convenient way to remove the umbrella if the need arises. For regions with a high snow probability, the glide elbow allows for easy removal during the snowy months. The Cantilever Umbrella will keep the outdoor fun going for longer.
