

Multi-Sail Square Shades

Price \$14,635.00

Highlights:

- Strong UV blocking capabilities
- Steel posts at four points to spread out tension
- Artful shade coverage for large and small areas
- Sloping fabric prevents excessive water pooling

Take a boring square shade to another level by choosing the Multi-Sail Square. The Multi-Sail Square is designed to create a cool restful area while allowing a slight breeze to sneak in through the split in the top between the two shades. The dynamic look of the shade adds movement and interest to an otherwise static shade. The Multi-Sail Square is supported by steel posts at four points that are coated in powder paint for increased durability. The fabric of the sail is comprised of Raschel knit woven fibers that have boosted UV blocking and strength against the wind. To extend the life of a sail shade, it is always recommended to take it down for storage during winter or harsh weather, which is why it was designed to be removed. Bring visual interest to your outdoor area with the Multi-Sail Square shade.
