

## Metro Style Trash Receptacle

**MSRP \$1,430.00**

**SALE \$1,216.00**

### Highlights:

- Lid is included with this product
- Crown keeps trash from overflowing
- Hinged side door for easy trash removal
- Simple style that will match any environment

The Metro Style Trash Receptacle by Webcoat is everything that you would want out of a waste bin. The simple yet elegant styling can complement a variety of benches and tables. The hinged door allows the trash in the bin to be emptied with ease. Lifting a bag out of a receptacle from the top can be a hassle since you might underestimate how heavy it has become. The side door lets you remove the liner via the side of the receptacle and then get the bag out without straining yourself nearly as much. The top of the frame is shaped into an attractive crown that will help this functional unit flatter any surroundings. This elevated crown also helps keep litter from ending up on the ground as it can contain a bit of overflow should the bin get a lot of trash after a really busy event. The Metro Style Trash Receptacle has a 36-gallon capacity and comes with a topping lid. The unit is finished with a coating of textured polyethylene that is available in one of several different colors. Please note, a liner is not included with this product and must be purchased separately.
