

In-Ground Mount Assembly for Trash Receptacles

MSRP \$93.50

SALE \$80.00

Highlights:

- Keeps trash bins upright and straight
- Prevents messes from tilted and unstable trash bins
- Attaches to any Webcoat Portable trash cans
- Choose a powder coating to match your trash receptacle

You probably are already well aware that trash bins have a tendency of falling over. This is traditionally the result of a little help from strong winds, hungry animals, or the occasional human clumsiness. Webcoat solves this problem with the In-Ground Mount Assembly for Trash Receptacles. It easily attaches to a receptacle with included hardware, and then it mounts in a single hole in the ground with the help of a little concrete. After accepting a formal quote, we give you the option of choosing a paint color that will complement your bins or another outdoor décor. Stop cleaning up trash that has been spilled onto the surrounding area and make your receptacles more secure, so the contents stay exactly where they belong. This assembly is made for commercial use, so it is built to last. The mount is available to fit 55-gallon receptacles and may vary slightly for specific models such as Taper and Crown Style Receptacles.
