

## Counting Shapes Corner Box

**MSRP \$1,062.00**

**SALE \$903.00**

### Highlights:

- Great for small children just learning to crawl
- Interactive knobs that help with number learning
- Fits wonderfully in daycares, churches or preschools
- Sloped face of the surface makes for easier interaction

**Age Group:** 6 to 23 months

**Unit Size:** 3' 6" x 10-1/2"

The Counting Shapes Infant Corner Box permits the smallest kids to easily crawl up to its angled surface and begin playing with its colorful mixture of numbers, movable knobs, and clever panels. Little learners can practice advancing their counting as they account for each of the groupings of shapes. The labeled knobs can be shifted along the track beneath to assign to each specific batch. And if they happen to get things mismatched the first time around, it's quite simple to rearrange the numbers once again. In addition to the education they'll be getting, children who play with the Counting Shapes Infant Corner Box will be developing their fine motor skills as they use their hands to push the numbers to and fro along the channel to exactly where they need to be. This item would enhance a nursery, kindergarten, church daycare, or anywhere the youngest children are gathered for playtime.
