

Freestanding Gas Pump

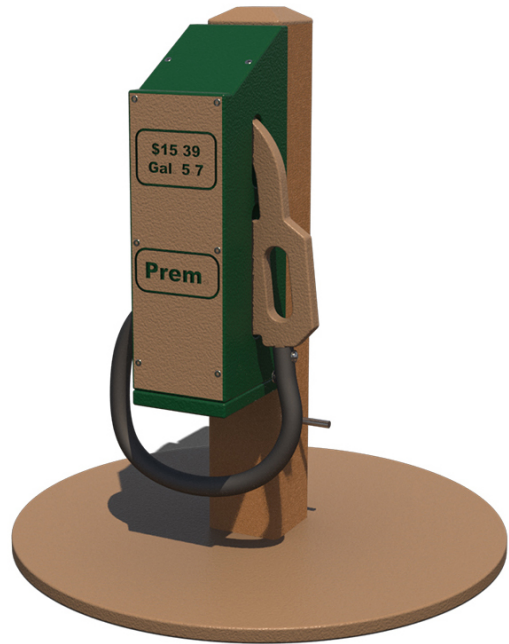

MSRP \$1,098.00

SALE \$934.00

Highlights:

- Clever details add to the realism
- Handsome colors and clear lettering
- Works as a solo item or as part of several facades
- Interactive pump handle can be taken out and reset

Age Group: 2 to 12 years

The Freestanding Gas Pump works well for play areas that normally see a lot of kids riding on bicycles, tricycles, or pedal cars. Children can pull up to the pump and get off their vehicle to “refill” its fuel tank or work with a friend who can pretend to attach the nozzle of the pump to the back. The handled pump is connected to a hose and can rest in a notch on the side of the tank, just like at a real gas station! This item works as either an individual dramatic play unit or it can be installed alongside any number of other faux storefronts and playhouses to help create an entire imaginary city for kids to tell stories in. The notes on the front of the fuel tank mention the quality of gasoline and its current price. The lettering is easily readable and it’s a fun little element that helps sell the scene for the kiddos pretending around the Freestanding Gas Pump.
