Age Group: 2 to 5 years

Use Zone: 20' x 16'

The School Bus Dramatic Play Vehicle is an amusing and large pretend play structure that a playground designer can use to instill a bit of dramatic storytelling potential into the area. This particular imaginary automobile lets small groups of kids interact in ways that are reminiscent of their own travels to and from school. Or, for smaller children, it could help them begin considering the bright future in store for when they begin advancing to the higher grades. The School Bus Dramatic Play Vehicle is painted with bright, eye catching colors and is designed to evoke the classic feel of an educational transport. The bus features two steering wheels in front and plenty of room for passengers in the back. The structure is also smartly decorated on the sides with a row of letters that will help kids get some practice with learning their alphabet. This structure is available in either a stable post mounted option or as a bouncy spring mounted version.
