

Uptown - Zion Trash Receptacle with Liner and Ash Bonnet Flat Top Lid

MSRP \$1,522.00

SALE \$1,294.00

Highlights:

- Colors can be customized to your preference
- Robust steel body resists damage
- Modern style that's functional and eye-catching
- Comes with liner and a lid that contains an ash container

Capacity: 36 gallon

The Zion Trash Receptacle with Liner and Ash Bonnet Flat Top Lid is a fully functional waste container that is also designed to be visually attractive. The main body is built of vertical steel strips that help the trash can stand up to accidental damage or deliberate attack. A metal lid is placed on top of a 36-gallon liner (both included). Connected to the standard lid is an additional refuse drop-off spot: a smaller dish that can be used for discarded cigarettes or cigars. Having this present should help persuade smokers to avoid dropping their ashes carelessly on the grounds about your plaza or park. And, more importantly, it should minimize the risks of a still-burning ember being carelessly thrown away with standard trash and potentially creating a fire risk. This receptacle is available in the hue shown on the page or you can choose to have the waste bin's colors customized to one of several alternate shades.
