SALE \$1,180.00

Highlights:

- Possesses clean modern lines
- Tough exterior made of durable steel
- Rain bonnet helps stop water from entering liner
- Perfect for office parks, playgrounds, or city streets

Capacity: 36 gallon

The Zion Trash Receptacle with Liner and Rain Bonnet Flat Top Lid is a 36-gallon waste container ideal for placement in urban areas like town plazas, zoos, shopping center entrances, and along sidewalks. The exterior is built of sleek metal strips that add aesthetic appeal while also offering considerable protection against the receptacle being damaged from deliberate vandalism or accidental falls. The steel is finished with a powder coat application and the unit can be bought with the colors shown here or it can be customized to one of several alternate tones. This painting process leaves an incredibly durable layer of color on the surface of the container which means the waste bin will stay vibrant and bright for a considerable time even after repetitive exposure to harsh weather. The Zion Trash Receptacle with Liner and Rain Bonnet Flat Top Lid comes installed with an overhanging cap that is attached to the removable lid of the unit. This bonnet helps stop rain from entering into the container, which can cause trash decomposition and then cause unwanted smells.
