SALE \$862.00

Highlights:

- Powder coated paint finish
- 4-foot and 6-foot length options
- Bench welded together with durable steel
- Contemporary design works well in modern settings

Webcoat's Arcadia Bench without Back is a durably built seating installation that displays clean lines and a lustrous finish mimicking wooden slats. The pleasing appearance of the bench makes it an ideal unit for placement in urban settings like university grounds, office lobbies, park plazas, and zoos. This strongly constructed bench is composed of fully welded steel and it will stand up to years of use by individuals of various heights and sizes. This seat comes as either a 4-foot or 6-foot long bench. The bench's slats inhibit water from collecting on the sitting surface which accelerates the unit drying after exposure to rain. The Arcadia Bench without Back is purchasable in the color shown on this page or you can change the tones to one of several different powder coat color options. Please contact a AAA State of Play salesperson to discuss color customization. The bench is also available as a portable unit or with surface mounting hardware.
