- Powder coated paint finish protects it from scratches and fading
- Flat top, rain bonnet, or ash bonnet lids are available to fit your needs
- Stylish design fits modern locations

Webcoat's Biscayne Trash Receptacle with Liner and Lid (3 Lids to Choose) is optimal for retail locations, city plazas, town squares, and university grounds. The spacious 32-gallon capacity should help minimize bag replacement within the included liner. There are 3 lids to choose from: a Flat Top, Ash Bonnet, or Rain Bonnet. A Flat Top lid creates a simple and sleek finish to the unit. Ideal for smoker friendly venues, the ash-bonnet lid grants smokers a safe place to put their cigarettes. If you live in a rainy area, you may choose a rain bonnet lid to reduce the amount of water that enters the trash bin. The outside area of the trash can exhibits careful craftsmanship in the form of geometric decorations that heighten the visual excitement of an essential item. By default, the unit works as a portable trash can. Surface mounting is possible but requires a separate purchase of appropriate hardware. A durable receptacle, the structure features a powder-coated paint finish to keep the exterior dazzling and bright even after exposure to inclement weather. Contact a AAA State of Play sales representative to learn about the variety of color options available to customize the unit.
