

Uptown - Gateway Recycled Plastic Slatted Bench with Back

MSRP \$1,736.00

SALE \$1,476.00

Highlights:

- Slats made of recycled plastic resinwood
- Space between slats enables beneficial airflow
- Durable aluminum frame
- Powder coated frame and recycled plank colors are customizable

Webcoat's Gateway Recycled Plastic Slatted Bench with Back is an ideal seat to place in a wide variety of locations, from shopping malls and civic centers to nature parks and playgrounds. The ecologically friendly recycled material of the planking has the natural appearance of wood without the stricter maintenance requirements. This commercial-grade seat has its slats carefully arranged to allow for airflow through the bench to maximize user comfort and to help the unit dry faster after rainfall. The aluminum framework lightens the bench, which can be a huge benefit during the relocation of the seat. The Gateway Recycled Plastic Slatted Bench with Back can be bought in colors other than what is shown here. Speak to a customer service representative from AAA State of Play to learn about what color options are currently available for both the planking and the frame. The unit is available in 4-foot and 6-foot lengths and has a blended portable/surface mount for versatility (surface mounting hardware not included).
