MSRP \$1,878.00

SALE \$1,597.00

Highlights:

- 6-foot long unit can comfortably sit multiple people at once
- Ergonomic design improves posture
- 3-inch tube legs create a strong base
- Reinforced with metal tubes throughout the body for a durable build

Provide comfort to your visitors with the Arches Recycled Plastic Slatted Bench with Back. The curved design helps sitters practice perfect posture as they relax and wind down. This ergonomic design makes the unit a great addition to any park, trail, or school, restaurant, or building. Choose your color of recycled plastic planks and powder-coated tube legs to match your property or to simply stand out. The recycled plastic is durable and strong and unlike traditional wooden benches, the plastic material is not prone to degradation due to rotting, insects, or water exposure. This helps to keep the bench looking nice and brand new for a substantial time. Three metal tubes run through the bottom, middle, and top of the planks to strengthen it, creating stout outdoor furniture. Two 3-inch square tube legs create a sturdy foundation to handle multiple people at once. Secure this 6-foot bench to your area using either an in-ground mount or surface mount. Talk to a sales representative for more details.
