- Sleek, minimal design will attract patrons

---

Take a seat and relax on the Arches Recycled Plastic Slatted Bench without Back. This bench offers a quick pit-stop for people at a bus stop, school, park, or business. At 6-feet long, this unit can handle multiple people at once. It is environmentally friendly, as the planks are made from recycled plastic. The bench has a pleasant-looking finish as the plastic 2" x 4" planks tastefully contrast the metal accents tube on the seat top while also providing a smooth and comfortable seat. A slew of color options is available for the planks and frame, granting you options when coordinating the unit with the surrounding area. The minimal design makes it superb for small areas and allows for multiple benches to be positioned without taking up too much space. An in-ground mount is a perfect way to attach the bench to the ground, while a surface mount is a superb way to affix the unit to concrete. Talk to a salesperson for more information.
