

Arches Recycled Plastic Slatted Cantilever Bench without Back

MSRP \$1,336.00

SALE \$1,136.00

Highlights:

- 6-feet long seat
- 4-inch steel tube base
- Comfortable, arched design
- Slender design fits any space

Settle down and decompress on the Arches Plastic Slatted Cantilever Bench without Back. This bench is ideal for short stops, making it an impeccable addition to bus stops, parks, or any place of business. An arched seat, combined with the lack of a back, grants users the ability to move their legs and bodies about freely. If placed outside, the curved seat also allows it to dry quickly after a rain-shower. The cantilever design includes a decorative 4-inch steel tube base that adds a bit of flair to the sturdy base. The minimal design allows the bench to fit in compact spaces and mix in with any area. Fabricated from recycled plastic planks and fortified with steel tubes, the frame is made to last. Choose from a rainbow of hues to harmonize the unit with your surrounding area. Select between a surface or in-ground base to match your needs.
