

Uptown - Arches Recycled Plastic Slatted Cantilever Table

MSRP \$3,957.00

SALE \$3,364.00

Highlights:

- Hearty 4-inch steel support posts create a robust base
- Colors can be customized to suit your site
- Eco-conscious recycled plastic planking
- Surface or in-ground mounts available to meet your needs

Age Group: 1 to 3 years

Webcoat's uniquely designed Arches Recycled Plastic Slatted Cantilever Table utilizes durable single cantilever posts that mightily hold up a 6-foot tabletop and two 4-foot benches in seeming defiance of gravity. These surfaces are reliably supported by the stainless steel construction of the framework attached to the individual posts and can safely handle the usage by a variety of occupants over a long period of time. The dramatic visual of this unit makes it a solid choice for landscape designers looking to enhance the usability of university grounds, dining patios, office parks, or town squares. The clean lines of the furniture's shape are further enhanced by the rounded edging of the seats and table which help minimize the annoying abrasion caused by more severely angled tabletops and benches. Surface or in-ground mounting hardware is selectable with this purchase and you can specify alternate colors for the frame and recycled plastic planks if you would like something other than what is shown here. Simply call or email AAA State of Play to speak to a salesperson about currently available alternate hues and learn more about scheduling.
