MSRP \$627.00

SALE \$533.00

Highlights:

- Classic functional design
- Spacing for up to five bikes
- Long-lasting powder coated paint finish
- Surface and in-ground mounting options

You will definitely see an increase in bicyclist traffic at your site when you install Webcoat's 2-Hump Wave Bike Rack in front of your establishment. Cyclists have a growing presence in urban areas with each passing year and it can be frustrating for them when they cannot find a location to secure their transportation. This classically designed bike rack will instantly get their attention, whether it is at a retail location, college campus, employee lot, or elementary school. The waved shaping permits up to five bikes to be parked and locked down. Finished with a powder-coated paint application, this unit can have its colors adjusted to whatever suits your needs. And this process will help keep the bike rack looking vividly bright for a considerable time. Please reach out to a AAA State of Play salesperson to learn more about what shades are currently available. The 2-Hump Wave Bike Rack is purchasable with surface mounting or in-ground mounting hardware.
