- Complete the look with a lid, liner, or mount (sold separately)

Capacity: 32 gallon

When rubbish and garbage take over a space it can be very unsightly and sometimes even dangerous when it comes to furry companions who like to sniff and eat whatever they see. The Paws Design Regal Style Trash Receptacle provides a distinctive place for trash that visitors cannot miss. Having this item at the edge of your playground ensures the safety of dogs, birds, or even squirrels as they will be less likely to sniff or eat things that should be disposed of. After all, a safe pet is a happy pet. This item has a 32-gallon capacity to ensure that trash will find a place in this sleek and inviting wastebasket (lid and liner are sold separately). This trash receptacle is made of expanded metal that has diamond-shaped perforations that allow air to flow in and keep odorous smells out. The metal is coated in textured polyethylene to give it its color while also making it easier to clean and durable.
