- 32-gallon capacity can handle trash from a day of play

Capacity: 32 gallon

Encourage owners to discard their trash the correct way with the Paws Design Classic Style Trash Receptacle. This unit can be placed in a community dog park and will set the tone for the area with its paw print design that is carved onto the front. The receptacle is made of metal that is painted in a textured polyethylene coat to create a durable and easy-to-clean unit. Dog owners can easily and securely dispose of any trash that may come from a day of play with their pup, whether it be waste, water bottles, or food packaging. It has a 32-gallon capacity, which is large enough to handle high traffic areas. Personalize the unit with your choice of lid and liner, both of which are sold separately. If you would like to position it in place, mounts are available and can be bought separately. Contact a AAA State of Play sales representative for more information.
