

Webcoat Ubrace Umbrella Support

MSRP \$63.70

SALE \$55.00

Highlights:

- Discrete and complementary design
- Provides a stout base for umbrellas
- Easy and quick to install
- Can be used with an already existing table

Get the Webcoat Ubrace Umbrella Support to securely attach your umbrella to your table. This product works perfectly for Webcoat tables that have a pre-drilled hole for umbrellas. This 3-inch aluminum brace discretely adheres underneath your commercial-grade table. Stainless steel fasteners clamp onto your umbrella, helping to keep it in place and stop it from flying away or swaying during windy days. To put it in place, simply put the umbrella through the pre-drilled hole, remove the two bolts on the sides of the brace to open up the unit, place it around the pole, and tighten the bolts with the provided allen wrench. This simple and quick installation process creates a low-maintenance unit and removes the need for a weighted base. The brisk set up allows users to clamp down the umbrella in place to make sure people are protected from the sun's harmful UV rays and to keep cool during the sizzling summer days.
