Highlights:

- Simple and easy activity can be enjoyed by any sized dog
- Posts built of 100% recycled HDPE for an eco-friendly build
- Great warm-up activity
- Mounted in-ground to keep it in place while dogs play

Canine owners know that there is more to a great dog park than just a fenced area around grassy ground. Smart site builders can help their site stand out by including fun activity installations for dogs to interact with and play on. Webcoat's Climb and Sit Recycled Plastic Dog Park Play Equipment is a fantastic item to include if you are wanting to appeal to these attentive pet owners. The two-tiered platform lets dogs jump and climb up the installation, whether on their own or by way of direction from their owner. The wood-like appearance of the unit is a fine complement to the natural fur of the animals that will frequent the spot. The piece's posts are made of 100% recycled HDPE for an environmentally-friendly build. This dog activity item is simple to clean and easy to maintain. The Climb and Sit Recycled Plastic Dog Park Play Equipment uses in-ground mounting hardware to stay in place as dogs play on top of it.
