- UV-stabilized panels resist color fading

Use Zone: 28' x 33'

The Dog's Best Friend Recycled Plastic Dog Park Play Equipment by Webcoat is sure to please pet owners once they see that its collection of activity stations has been incorporated into the local dog park. Adding this set of structures will make your dog park stand out and will earn you deserved accolades once people see the number of different things their dogs can do. The Dog Log Tunnel and Home Sweet Home units will let an owner play peek-a-boo with their furry friend as they scurry through short horizontal passages. The Jump Through and the High Jump will test Fido's vertical leaping ability. Finally, Stepping Up and Climb and Sit offer different kinds of elevated platform combinations where dogs can practice ascending and descending from the steps. All units in the Dog's Best Friend Recycled Plastic Dog Park Play Equipment collection use in-ground mounting hardware to create a stout base.
