

High Jump Recycled Plastic Dog Park Play Equipment

MSRP \$846.00

SALE \$720.00

Highlights:

- Uses eco-conscious materials
- Simple maintenance
- Adds excitement to dog parks
- Challenges canine intelligence and agility

The High Jump Recycled Plastic Dog Park Play Equipment by Webcoat is a smart way to liven up your local dog park and help canines improve their exercise routines. This agility test uses in-ground mounting hardware to securely lock the unit down into the natural earth. The two bars are elevated to different heights to allow both large and small dogs the chance to leap up and over the intervening obstacle. This resilient equipment is easy to clean and requires minimal maintenance. This activity station employs some ecologically friendly material as part of its construction, such as posts made of 100% recycled HDPE plastic. Other plastic in the High Jump employs anti-static inhibitors to help maximize dogs' comfort. The smaller footprint of this equipment helps you with site planning as it's easier to fit into existing spaces that might already have exercises installed. High Jump Recycled Plastic Dog Park Play Equipment will please dog owners looking to take their pets places that will keep them physically fit and mentally engaged.
