

Hurdle Jump Recycled Plastic Dog Park Play Equipment

MSRP \$1,322.00

SALE \$1,124.00

Highlights:

- Green material in the form of 100% recycled posts
- Care-free and simple maintenance
- Employs in-ground mounting hardware
- Different color combinations possible

Your dog park can stand out and heighten the excitement of both visitors and their furry friends by installing the Hurdle Jump Recycled Plastic Dog Park Play Equipment on the grounds. While dogs do require exercise time and benefit from getting outdoors on a regular basis, it can still seem a bit boring to a canine owner to arrive at a dog park only to discover a plain patch of grass enclosed by a fence. This play activity unit is ideal for testing the agility of larger breeds and giving them a task that will keep both their bodies and minds in shape. Made partially of ecologically friendly components, each hurdle has posts made of 100% recycled plastic material. The remaining pieces are UV-stabilized HDPE plastic panels. These hurdles use in-ground mounting hardware and are remarkably easy to clean. The colors of both the recycled plastic-lumber posts and the HDPE panels on top are customizable. Please contact a salesperson to discuss what colors are currently available.
