- Can be arranged based on your preference

Use Zone: 44' x 34'

Pups will be wagging their tails with excitement as they lay their eyes on the Master Companion Recycled Plastic Dog Park Play Equipment. This collection of activities offer a fun challenge at every corner. Dogs will prove their balance skills as they mount the Walk the Plank, which has sloping sides that will require them to work on their coordination. They can then travel through the Dog Log, moving their agile bodies from one end to the next. Using that same agility and coordination that they used before they can hop past Through the Target which features a large hole that dogs will have to get through. The Limbone tests how high they can jump and how low they can go with its adjustable horizontal bar. The Over and Under offers a similar experience, attracting pups with its bone carving on either side of it. Home Sweet Home provides a cool place to rest, reminiscent of classic dog houses while also providing a bit of shade. The Master Companion Recycled Plastic Dog Park Play Equipment is an action-packed course that has a little something for everyone.
