Highlights:

- Small pet obstacle course that will fit petite venues
- Fun activities improve cardio for energetic dogs
- Home Sweet Home offers a place to relax after a long day of play
- Jump Through and Nice Turn improve agility and coordination

There is no doubt that pets will be wagging their tails in excitement at the Pawsitively Playful Recycled Plastic Dog Park Play Equipment. The puppy playground course includes four different activities that will provide a fun aerobic exercise for visiting dogs. The Stepping Up pedestal climbers can be set at different heights for dogs to jump on as an introductory challenge or cool down exercise. Nice Turn offers a little fun for any size dog as they shimmy through from one end of the tunnel to the other. The Jump Through works their muscles while improving the jumping skills and precision as they hop through the hole. When they need a break they can rest in the shade of Home Sweet Home or stroll through for a nice change of pace. All of the items in this course feature posts made of recycled plastic material for an eco-friendly build. The panels are UV-stabilized to prevent color fading and cracking due to sun exposure.
