

Stacking Patio Chair with Two-Piece Design

MSRP \$480.00

SALE \$408.00

Highlights:

- Comfortable back is good for relaxation
- Conveniently stackable and portable
- Perfect for outdoor events or restaurants
- 18-inch seat height

The versatile Stacking Patio Chair with Two-Piece Design can be used for any occasion. Its lightweight nature allows this chair to be moved from event to event. It is also designed to be stackable, so multiple chairs can be stored or moved at once. The comfortable back allows people to relax and unwind. Whether it is needed for backyard parties or businesses, this chair will keep people relaxed and comfortable. The interlacing design of the #9 expanded metal keeps the chair cool and clean. This makes it especially great after a rainy day as the smaller surface area aids in drying it quicker than other chairs. Dipped in paint and then heated, this chair is painted in a textured polyethylene coat. This makes it ultra-durable, strong, and scratch-resistant to keep it looking like new even after years of use. A large mix of color options are available. Talk to a sales representative for more information.
