- Heavy gauge pulley system for opening and closing

Webcoat's 7.5-foot Octagon Market Umbrella with Fiberglass Frame with Pulley System is a tough commercial-grade shading solution that you can use to improve recreation time at your outdoor patio area. This umbrella is built of durable elements such as a fiberglass frame that incorporates heavy gauge resin and stainless steel. It features a helpful pulley system that is easy to use when needing to temporarily lower the umbrella on windy days or when you need to put in the equipment in storage. The colors of the umbrella's acrylic fabric material and its metal frame are customizable, allowing you to keep them the same shade or coordinate the hues to complement each other and your site. Please reach out to AAA State of Play Customer Care Personnel if you would like to learn more about what color options are currently available and to learn about scheduling opportunities.
