

7.5-foot Octagon Patio Umbrella with Tilt Steel Frame and Crank Lift

MSRP \$362.00

SALE \$308.00

Highlights:

- Tough stainless steel frame
- Works with most Webcoat tables
- Tilt frame lets you adjust umbrella angle
- Easy to use crank lift for raising and lowering

The 7.5-foot Octagon Patio Umbrella with Tilt Steel Frame and Crank Lift by Webcoat is a great, commercial-grade shading solution for those who already have a Webcoat table. This unit is made of resilient steel components in the framework, and the umbrella itself is a durable heavy gauge vinyl material. This umbrella will help complete your outdoor recreation area, whether you are seeing guests use the location for dining, conversation, or table gaming. The shading of the umbrella can effortlessly be raised or lowered through the simple-to-use crank lift that is attached to the frame. You can adjust the angle of the umbrella to better shield against the changing direction of the sun's rays thanks to the tilt frame engineering. If you do not care for the colors shown here, there are alternate hues available that can be applied to both the shade and the framework. Please contact a AAA State of Play salesperson to learn more about additional color tones.
