MSRP \$1,071.00

SALE \$911.00

Highlights:

- Resilient steel construction
- Parking for up to eleven bikes
- Colors are customizable
- Surface and in-ground mounting options

Webcoat's 5-Hump Wave Bike Rack is an excellent parking solution when you are looking to enhance the accessibility of your site and invite travel by more than just automobile drivers. Many locations benefit from such installations, such as college campuses where cars are often prevented from directly accessing a building entrance. The sizable quantity of spacious gaps between the classic wave-like crests of the unit allows for the parking and securing of up to eleven bicycles of various sizes and shapes. The durable steel construction can withstand the toughest weather conditions and the most rigorous usage. And the powder coat finishing keeps the paint job looking stunning. If you are not satisfied with the colors shown here, just call or email AAA State of Play to learn more about alternate hues available and discuss scheduling opportunities. Webcoat's 5-Hump Wave Bike Rack can be bought with as a surface mount for installation in concrete or as an in-ground mount that which works well for natural earth locations.
