- Capacity for up to seven bikes

Tap into the growing wave of environmental awareness by installing Webcoat's 3-Hump Wave Bike Rack at your retail shop, school, or corporation and show that your site is a contributor to positive change. A bike rack like this diversifies your location's transportation possibilities and helps court more than automobile users. This durable steel unit facilitates parking and lockdown up to seven bicycles. The spacious gaps between the rack's wave-like form allow for bikes of various shapes and sizes to comfortably rest against it. This unit is purchasable with surface mounting hardware ideal for hardtop situations like concrete or in-ground mounting hardware that is a better fit for natural earth. You can gain a biker's attention better by coordinating the color of the 3-Hump Wave Bike Rack to your building's frontage. A number of alternate hues are possible to apply and the powder coat process will keep those colors vibrant and bright for a long time. Please speak to a salesperson to learn more about color customization and scheduling.
