**MSRP \$380.00**

**SALE \$323.00**

### Highlights:

- Solid steel construction
- Choice of mounting options
- Powder coated paint finishing
- Can accommodate up to 2 bikes

You can quickly and effectively generate interest from bicyclists by including the Horse Shoe Bicycle Rack by Webcoat as a dedicated spot for them to place and secure their primary mode of transportation. This rack features a simple but reliable design that can be installed at your site to attract the attention of cyclists who desire to park their bikes to do other opportunities. This rack is built of resilient steel and shaped into a round partial circle. The steel is finished with a powder-coated paint application that is tough enough to keep the bike rack's colors dazzling and attractive even after years of weather exposure to the wind, rain, and sun. The 36-inch wide by 31-inch tall rack can hold up to 2 bikes and its smaller footprint allows you to place several near each other while still allowing adequate spacing. The Horse Shoe Bicycle Rack is purchasable in the color shown here or you can call or email AAA State of Play to learn about currently available alternative colors. The bike rack can be bought with either in-ground or surface mounting hardware
