

## Ring Style Bike Bollard

**MSRP \$240.00**

**SALE \$204.00**

### Highlights:

- Holds two bikes at once
- Unique and contemporary design
- Can be surface or in-ground mounted
- Provide bikers a place to lock up their bikes

The Ring Style Bike Bollard provides a secure place for cyclists to place their bike. Standing upright at 38-inches tall and stretching out to 17-inches wide, this unit can be placed anywhere in your outdoor area. The structure can be combined with multiple other racks to accommodate areas of high bicycle traffic. This makes it ideal for schools, parks, trails, city sidewalks, or places of business. The ringed design allows for a bike to be linked on each side while giving them ample space for separation so that they do not touch. The frame is made from steel to ensure a strong, stout, and durable bike rack that will last for a long time. It is painted in a powder coat to liven up the unit. This rack can be installed through a surface or in-ground mount to fit your needs. Contact a sales associate for more details and color options.
