

Alpine Peaks Recycled Plastic Play System

Price \$63,032.00

Highlights:

- Three sets of slides set at varying heights
- Assortment of climbers keep kids active
- Photographs of mountain ranges decorate the structure
- Castle Roof flags add a unique element

Age Group: 5 to 12 years

Capacity: 69 - 95 children

Use Zone: 49' x 39'

Take a journey into the Alps with the Alpine Peaks Recycled Plastic Play System, one of the largest structures Play Mart offers. There are images of mountain ranges scattered throughout the unit so kids can imagine they are on an expedition. The roofs are pointed and have mountain designs sketched on them with flags on top to hammer in the adventurous theme. As an ode to nature, the unit's posts, decks, steps, and railings are made using Recycled Structural Plastic (RSP). These RSP components are available in four different colors and, unlike wood, are resistant to termites, rusting, splinters, and color fading. A wide selection of activities makes this a versatile play set that will accommodate kids aged 5-12. Younger kids will have fun on the 3-foot Double Slide while older kids will flock to the towering 9-foot high Reversing Spiral Slide. A wavy 6-foot Alpine Thunder Slide provides a "just right" combination of the other two slides that Goldilocks herself would approve of. Kids can pretend they are scaling a mountain with the Rock Wall Climber or the Rope Net Climber. This is a superb way for kids to work on their motor skills, movement planning, balance, coordination, and strength.
