**Age Group:** 5 to 12 years

**Capacity:** 29 - 45 children

**Use Zone:** 38' x 28'

---

Capture young hearts with the BEARback Recycled Play Structure. This compact playset is filled with exciting activities. Children can work on their upper body strength and balance as they drift along the Super Glider. It doubles as a fun entryway and exit to and from the main deck. Once on, kids can trek across the platform to the slide. The Left Veer Chute Slide faces away from the Super Glider so kids will not run into each other. Kids can work on their strength, coordination, and motor planning skills with the Yosemite Rock Wall Climber and Rope Net Climber. They are located right next to the slide for ease of access. A smaller Rock Climber is placed in the back of the unit for younger kids to enjoy. Musically inclined kids will have a blast playing with the Chime Panel. The posts, deck, steps, and railings are made from Recycled Structural Plastic. This wood alternative is strong and inhibits termites, fungus, rusting, and splintering. Pick from four color options to match your venue.
