**Age Group:** 5 to 12 years

**Capacity:** 69 - 95 children

**Use Zone:** 53' x 46'

Eco-friendly patrons will love the environmentally-conscious Coyote Recycled Plastic Play System. Play Mart uses Recycled Structural Plastic (RSP) to build the posts, decks, rails, and steps. It is strong and defies termites, fungus, splinting, and rusting. The suitably named Coyote Recycled Plastic Play System features images of coyotes across the unit. This large structure can accommodate up to 95 children at once and features a wide range of play activities, making it perfect for elementary schools or parks. It is spaced out to create ample room for kids to play. Multiple slides surround the play structure and allow kids of varying age ranges to play and pick their own areas to explore. Younger kids can start on the 3-foot Turn Slide and play with friends on the 4-foot Double Slide. Older kids can progress their way up to the 6-foot Wave Slide. A Fireman's Pole grants children the opportunity to become a firefighter. Older children will test their strength, coordination, and balance on the Turn Ring Ladder and the Rock Wall Climber.
