- Thatch roofs add a tropical element
- Pair of slides at different heights to choose from

Age Group: 5 to 12 years

Capacity: 42 - 60 children

Use Zone: 28' x 44'

Experience the seas with the Dolphin Recycled Plastic Play System from Play Mart. Images of birds, dolphins, and an anchor embellish the unit to produce a nautical theme. Thatch roofs decorate the top of the unit, creating a tropical feel. In-line with Play Mart's values, they are made from environmentally friendly synthetic material. In addition to this, recycled high-density polyethylene makes up parts of the structure. Unlike metal and wood, it does not rust and it resists fungus and termites. It is built and designed with the next generation in mind, producing an environmentally-friendly and fun place for kids! A large, 5-foot Wave Slide couples the 3-foot Turning Slide and offers kids both big and small a place to play. Musicians will flock towards the Chime Panel as they produce melodic sounds for their friends to hear. Energetic youngsters will love to challenge themselves on the Lazy Loop Climber or either of the Vertical Pipe Ladders. Separate from the platform, there are Stepping Stool Leaves, an intuitive play structure that youngsters will test their balance on.
