- Paired slides increase the fun
- ADA Daytona Driving Panel stimulates imaginative play

Age Group: 5 to 12 years

Capacity: 40 - 56 children

Use Zone: 39' x 37'

Bring tropical paradise to your venue with the Islander Recycled Plastic Playground by Play Mart. A decorative image of an island at the top produces a relaxing environment. This fun structure is full of enchanting activities. Two slides at the apex of the unit face away from each other to keep kids from running into one another. Kids can zip down the 5-foot Left Veer Chute Slide to land near the Vortex Climber. From there, they can climb up the unit to reach the taller, 6-foot Wave Slide to create a never-ending loop of fun. Children can hang onto the poles of the Sloping Wiggle Step Bridge to test their balance and coordination. The environmentally friendly structure features decks, rails, steps, and posts that are made from recycled high-density polyethylene. It also uses EcoColor Plastic that is UV protected to resist fading. Contact a AAA State of Play salesperson for more information.
