- Large playset that can accommodate lots of users at once

Age Group: 5 to 12 years

Capacity: 79 - 99 children

Use Zone: 57' x 59'

Take a trip to Hawaii with the Kilauea Recycled Playground from Play Mart. Always one with nature, this structure uses recycled high-density polyethylene to help create an ecologically sound unit. This unique Recycled Structural Plastic (RSP) will not rust or fade like metal does, nor will it rot or splinter like wood tends to. Other pieces of the structure are built with EcoColor Plastic and stainless steel. This spacious and "green" structure is brimming with electrifying activities. Kids can test their upper body strength on the Sloping Super Glider and the Sloping Dual Ring Ladder. The Rock Wall Climber and Rope Net Climber offer a total body workout, increasing body coordination, motor planning skills, and strength. Four slides allow more children to slide at once, reducing time spent waiting in lines. Kids can start their sliding journey on the small Chute Scrambler and the 4-foot Wave Slide and work their way up to the taller Stratosphere Slides on the opposite end of the unit.
