- Super Glider and bridges promote balance control

Age Group: 5 to 12 years

Capacity: 69 - 95 children

Use Zone: 49' x 56'

Kids will look up in awe at the voluminous Kilimanjaro Recycled Playsystem from Play Mart. The large unit offers both physical and mental exercises for kids young and old. Improve coordination and motor planning with the Rope Net, Rock Wall, and Ladder Climbers. The Super Glider will test a child's upper body strength as they hover above the ground from one end to the other. For mental acuity, a Driving Panel and Gear Panel are used to stimulate imaginative play. A variety of slides offer fun ways for friends to play. Three friends can race each other on the 6-foot Alpine Thunder Slide while two buddies can go down the 5-foot Double Wave Flare Slide. Several images and engravings of animals adorn the unit, giving the structure an exciting and heartwarming feel. Evocative of the animal pictures, this playset is environmentally friendly. A portion of the structure is built using Recycled Structural Plastic (RSP) and EcoColor Plastic to minimize its carbon footprint and reduce plastic waste.
